"Groundswell" of Climate Actions from New Actors

Key questions have emerged about the "Groundswell"

- How do they relate to state initiatives?
- Are they comparable?
- Do they 'measure up'?

“

I firmly believe that every one of us can step up and become leaders in combating climate change.

”

SUMMING THE SUMMIT

111

NATIONAL
GOVERNMENTS

Nearly thirty commitments were made at last September's historic United Nations Climate Summit in New York. Who pledged what and how do the actions add up?

- Only 5 considered 'additional'
- Only 2 had explicit financial pledges

The Path to Measuring New Kinds of Climate Action

- What criteria/thresholds to set?
- How to account for additionality, overlaps?
- What to do about vertical integration?

Challenges for the Lima-Paris Action Agenda

- How to integrate actions into UNFCCC
- How to discourage 'greenwashing'
- Ensure sustainability beyond Paris
